

## Stream Box multiroom application

- Combine **several Stream Box DS** to a multiroom audio system with Windows Media Player 12 (Windows7 PC)
- **Audiophile playback** because of Stream Box DS
- **In each zone different music** at the same time
- Create individual playlists for each Stream Box and change „on the fly“
- **Selection of music** can be done **centrally** from PC and **local** via tablet or smartphone using **Plug Player**
- **Volume control** is done with a **local amplifier**
- No Stream Box setup necessary.- Local selections will be suspended, when central WMP12 command is performed.
- Repeat function
- **Unlimited number of zones** (depends on capacity of network and PC)

Special hint: Party mode is possible with Jamcast/iTunes

### Using „WMP 12“ for multiroom applications

- 1) Implement each Stream Box DS in same network (see Stream Box manual) and assign individual names to each Stream Box DS
- 2) Open Windows Media Player 12 on PC
- 3) Select music for playback and with a click on right mouse button „Play to“ appears and select from choices (see screenshot 1)  
**or**  
 drag&drop complete genre, artist, albums...into playlist and then select renderer (screenshot 2)
- 4) Repeat 3) for any additional Stream Box DS and for each an individual play-screen will be displayed
- 5) Done! Now every Stream Box is playing different music at the same time!
